

CONSERVATION PLANNING—HIGH COMMENDATION

Legacy Way Tunnel Project Environmental Approvals Report

This report included pre-project documentation for the five Heritage-registered places in the vicinity of the Legacy Way Project. While the simplest was the No. 3 bus shelter on Given Terrace, the place which required the most study was St Brigid's Church at Red Hill, designed by architect Robin Dods.

The report included good use of technical testing, inspection and led to repairs being undertaken at the same time.

Awarded to: Conrad Gargett

Brisbane Central State School, Conservation Management Plan

This Conservation Management Plan that addressed the heritage significance of all components of the Brisbane Central State School – from the 1874 Block A to the 1951 former Infants School.

The plan included the history of site, good chronology and mapping, detailed footnotes, and most importantly, competent and useful policies.
