Old maps of Australia or parts of it!

• In 2013 the National Library, Canberra offered an outstanding exhibition of old Maps (7 November 2013 to 10 March 2014). Perhaps more than half of these maps were related to the Dutch landings on the Australian and New Zealand Coast during the 17th century, probably the first such landings by Europeans. Of the others some were of earlier origin, on loan from European museums.

• The maps shown in this presentation concentrate on the Dutch maps, mostly by cartographers in the service of the Vereenigde Oost Indie Compagnie (VOC) - United East Indies company - which maintained a lucrative spice trade between the Netherlands and the East Indies from 1600 - 1800

• In addition, some older maps of prior to 1600 will be shown as well as maps from around 1800 relating to the period after James Cook mapped the East Coast, the French took an interest in mapping Australia and Matthew Flinders finalised the mapping of the entire continent. The presentation will first look at the before 1600 maps, then proceed to the Dutch maps up to 1700, and finish up with the mapping activities from 1770 until 1814.

Tasman was born in a very small village in the province of Groningen, near the capital Groningen. He later joined the VOC in Amsterdam and sailed ships in Europe before being sent out to the Indies. There is a Museum in Lutje Gast devoted to Tasman. This is part of an original painting (1637), which also shows his second wife and daughter (not here). That original painting hangs in the Portrait Gallery in Canberra and is currently on loan at a well known Maritime Museum in the provincial capital city of Groningen.
